

# KAELO

SIT BACK, RELAX  
& READ ME

## THANK YOU

Everyone knows how incredible that first, perfectly chilled sip of wine, water or beer is.

I set out to create that experience for the whole bottle, and that's how *Kaelo* was born.

Cheers to you, and the exciting new addition in your home. I hope you have a wonderful time with your *Kaelo*.

**KEVIN JABOU**

*Founder & Inventor*

## YOUR KAELO

*Kaelo* offers a fun and effortless way to serve and enjoy drinks.

*Kaelo*'s patented dry-cooling technology creates a jacket of cold air which wraps around the bottle, keeping your drink within 1-2 °C of its opening temperature.

Your drink will be perfectly chilled, from the first glass to the last.

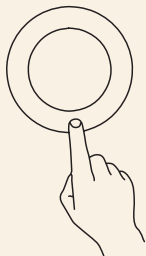

## TOUCH & SERVE

To turn on, simply tap any part of the Crown with your finger.

Your *Kaelo* will be cold within seconds, and ready for a chilled bottle.

To turn off, hold your finger on the Crown until the lights switch off then release. It should take 2 seconds.

*Kaelo* will automatically turn off after 2 hours of no use. Tap within the last hour to extend the time by an extra hour.

## PICK YOUR COLOUR

To change the colour on your *Kaelo*, simply tap 3 times. Once it's flashed, keep tapping until you find the colour you like.

To lock in a colour, do not touch the crown for 5 seconds.

*Kaelo* will remember your colour until you change it. Even if you turn it off and on.

To change colour, repeat this process.

## TEMPERATURE MODES

Kaelo Mode is available in all models.

If you have a *Kaelo Plus* model, you can choose between 3 modes, as described to your right.

To learn how to switch between modes, turn to the next page.

## KAELO MODE

Every time you turn on your *Kaelo*, it will be in Kaelo Mode.

If you're drinking something chilled, between 5-12 degrees, this is the one for you.

## RED WINE MODE

Red Wine Mode does what it says on the tin, it's for those red wine drinkers who prefer their bottle between 12-18 degrees.

## BOOST MODE

If your bottle isn't quite cold enough, Boost Mode is for you. It will chill a bottle by 3-4 degrees over half an hour. After 30 minutes, it will automatically go back into Kaelo Mode and maintain the new temperature.

## HOW TO CHANGE TEMPERATURE MODE

To change between modes, simply hold your finger on the crown and release when you get to your desired mode.

### LIGHT      MODE

- Off ● Turn Kaelo off
- Red ● Red Wine mode
- Aqua Blue ● Boost mode
- White ○ Kaelo mode

Once you've changed the temperature, the colour will revert back to the original colour. Which is why Kaelo comes with a...

## ...CHEEKY WINK

If you need a reminder of which mode you're in, tap once on the crown.

The colour of the flash indicates what mode you're in:

RED for Red Wine

AQUA BLUE for Boost

WHITE for Kaelo mode

## OPERATING ENVIRONMENT

*Kaelo* is intended to be used in ambient temperatures between 10 - 32 degrees.

If used outside of this, there may be a reduction in performance.

Prolonged use outside of this temperature range may cause damage to the product.

## CLEANING

When cleaning the Crown, use a soft cloth that will not scratch the finish.

If *Kaelo* is used for long periods of time, or in cold ambient temperatures, frost can develop in the chamber. This is normal and it will eventually evaporate.

## 2 YEAR WARRANTY

**Activate within 3 months of purchase by registering at [kaelo.co.uk/activate](https://kaelo.co.uk/activate)**

Should your *Kaelo* experience any quality or performance issues within 2 years of purchase, we will repair or replace it for free.

The warranty does not cover damage resulting from accidents or incorrect use.

To be valid, your *Kaelo* must feature an authentic serial label. This can be found at the base of the chamber, under the mat, or on the side of the base unit.
